

BODYFENSINE

A reinforcement of the skin's natural defense system

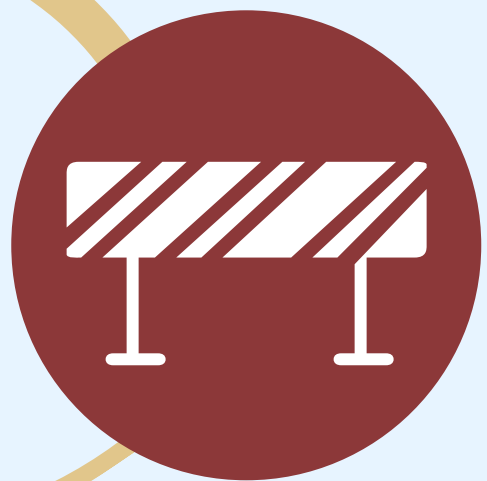

IMMUNITY

This tripeptide reinforces the skin's natural immune system to prevent the risk of infection and preserving the balance of healthy skin

BARRIER FUNCTION

Bodyfensine forms an immune barrier by stimulating the production of human- β - defensin -2 and -3

ELIMINATES PATHOGENS

Bodyfensine is designed to eliminate pathogens and combat microbial growth which can be responsible for skin infections

PROTECTS

A tripeptide which keeps the skin healthy, protecting it from external agents
